CAREER SUMMARY

Detail-oriented Data Analyst and Statistics student with a strong foundation in statistical analysis, and healthcare data, Excel, and Python. Proven ability to identify workflow inefficiencies and improve reporting turnaround. Background in data cleaning, and data visualization. Skilled in transforming raw data into meaningful insights that support informed decision-making. Experienced in working with real-world datasets and applying analytical techniques to solve practical problems. Passionate about using data to drive impact across businesses, healthcare, governance, and social development sectors, with a growing interest in global, remote-based analytics roles.

PERSONAL INFORMATION

Nationality: Nigerian

State of origin: Kaduna State

Place of Birth: Zaria, Kaduna State

ACADEMIC AND PROFESSIONAL QUALIFICATION

Data Science	2025
Click – On Kaduna Data Science Fellowship, Kaduna	
Relevant Software Learnt: Microsoft Excel Python SQL Power BI R	
Advanced Data Analytics	2025
Ihifix Digital Academy, Kaduna	
Relevant Software Learnt: Microsoft Excel Python SQL Power BI	
Bachelor of Technology (B.Tech) in Statistics	In - View
Abubakar Tafawa Balewa University, Bauchi State, Nigeria	

PROFESIONAL EXPERIENCE

Click On Kaduna Data Science Fellowship	2025-2026
Data Science Fellow, Kaduna	
- Analyzed real-world datasets using statistical and data analysis techniques to support evidence-based decision-making. - Cleaned, transformed, and managed datasets while ensuring compliance with data privacy and data governance principles. - Built dashboards and visualizations to communicate insights clearly to technical and non-technical stakeholders. - Conducted exploratory data analysis (EDA) to identify trends, patterns, and data quality issues. - Developed and deployed data collection tools using ODK scripting for field data gathering and validation. - Collaborated with cross-functional teams on data-driven projects addressing social and business challenges.	

Data Governance & Quality Assurance

- Implemented data governance practices to ensure data accuracy, consistency, and integrity across datasets.
-
- Applied data cleaning, validation, and preprocessing techniques using tools such as Python (Pandas) and Excel.
-
- Established data quality checks, including handling missing values, duplicates, and outliers to improve dataset reliability.
-
- Ensured compliance with data standards, policies, and documentation for reproducibility and transparency.
-
- Collaborated with cross-functional teams to define data requirements and maintain high-quality data pipelines.
-
- Monitored data quality metrics and performed regular audits to identify and resolve data inconsistencies.
-
- Maintained proper data documentation, including data dictionaries and metadata for improved accessibility.

DATA COLLECTOR / ANALYST (TRAINEE) 2024-2025

Ihifix Digital Academy, Kaduna

- Participated in the Trios market survey and Fintech survey data collection using Kobo Toolbox.
- Cleaned data using MS Excel and Power Query.
- Analyzed and visualized data using Python (Jupyter), MySQL, Excel, and Power BI.
- Analyzed bank-related data such as bank-churn rate.

Online Learning Platform Adoption Survey (Final Project) 2025

Ihifix Digital Academy, Kaduna

- Led a team of 5 members.
- Collected 619 (63.16%) of the data required from relevant stakeholders such as Students, HR/ Recruiters, Lecturers/Tutors, and employees using the Kobo toolbox.
- Cleaned the data using Power Query.
- Visualized using Power BI.

Lung Cancer Analysis March 2025

Futurion Upskilling, India

- Cleaned the dataset using Power Query
- Retrieved and analyzed data using SQL
- Visualized using Power BI
- Highlighted insights and recommendations

Data Collector

June - August 2025

KADRAAMP, Kaduna

- While at KADRAAMP, worked as a road features data collector.
- Contributing to accurate mapping and research that supported infrastructure planning and development.

Data Capture Specialist

October 2021 – November 2021

Exo Analytics, Kaduna

-
- While at Eko Analytics, worked on a survey project focusing on accurate data field insights to support research and informed decision – making.

SKILLS

-
- **Soft skills:** Leadership, Communication, Problem-Solving, Collaboration & Teamwork, Analytical Thinking, Adaptability & Learning Agility, Attention to Detail, Mentorship, Interpersonal Skills
 - **Technical skills:** Data Analysis tools such as MS Excel, Power BI, SPSS; Programming language such as Python, SQL, R and geospatial tools such as SW Map, Excel, Power BI, Data collection tools such as Google Forms, Kobo Toolbox.
 - **Analytical skills:** Data cleaning, visualization, reporting, problem-solving

VOLUNTEERING / COMMUNITY SERVICE

Club Liaison Officer, Sarah Smart Foundation, Kaduna State

2025 – Present

- Served as the Club Liaison Officer for the GREAP club at Christ Ambassador College, Sabo.
- Served as a point of contact between the club and the organization
- Collected data from 95 young teenage girls during the gender-based violence outreach awareness at Sabo, Kaduna.
- Participated in the distribution of Sanitary pads and the administration of the HPV vaccine to almost all teenage girls
- Carry out research and analysis for the organization
- Serve as a report writer for any outreach or programs conducted.
- Enlightened female students about GREAP, a club for educating girls through Community Engagement, Empowerment, and Climate Change Campaigns.

Project

Data Analyst (Project Experience)

Data Analyst (Fellowship Project)

Click-On Kaduna Data Science Fellowship (DSFP 5.0)

- Worked on real-world datasets to solve practical problems using data analytics techniques.
- Conducted data cleaning, preprocessing, and analysis to extract meaningful insights.
- Collaborated with a team to develop data-driven solutions addressing societal and business challenges.
- Presented findings through visualizations and reports to both technical and non-technical audiences

Customer Retention & Behavior Analysis

Dec 2025 – Jan 2026

- Analyzed customer data to identify patterns leading to churn and reduced engagement.
- Performed segmentation analysis to group customers based on behavior and usage trends.
- Applied data cleaning and transformation techniques to improve dataset usability.
- Generated insights that informed targeted retention strategies and improved customer experience.
- Visualized findings using dashboards and reports for clear stakeholder communication

AI-Powered NFTI Knowledge Chatbot Personal/Academic Project

- Developed an intelligent chatbot capable of answering NFTI-related questions using Large Language Models (LLMs)
- Implemented a Retrieval-Augmented Generation (RAG) system to ensure accurate and context-based responses
- Processed and stored NFTI documents using vector embeddings and a database (ChromaDB)
- Built an interactive user interface using Streamlit for real-time user interaction
- Designed the system to filter and respond only to relevant domain-specific queries
- Improved response accuracy by structuring data into optimized chunks and embeddings

WORKSHOP/ CONFERENCES ATTENDED

- Leaders of the Africa Institute Impact Research Workshop, 2025
- AFRISCALE SMEs Conference, 2025
- Cultivating a Data Culture: Leadership Strategies for Sustainable Development in Kaduna State, 2025

COURSES / TRAININGS

- Advanced Data Analytics, Ihifix Digital Academy, Kaduna, 2025
- Understanding Data Science, Datacamp, 2025
- Climate Voices Nigeria Bootcamp, NG Youth SDG, 2024
- General Computer training, BCG Data and Research Limited, 2024
- Essentials of MS Excel, Cambridge International Qualification, 2024
- DataCamp Completed structured coursework in data analysis, SQL, Python, Statistics and Data Visualization
